ATHUL MJ

DEVOPS ENGINEER

Kannur, Kerala | +91 8590000724 | athulmj8696@gmail.com | linkedin.com/in/athul-mj

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 2.1 years of experience designing and managing cloud infrastructure, CI/CD pipelines, and production deployments. Proven track record of delivering enterprise-grade solutions on AWS, automating deployments for multi-school ERP systems, and building scalable DevOps workflows using GitHub Actions, Terraform, and Ansible. Experienced working as a sole DevOps engineer on contract, collaborating directly with development teams to bridge infrastructure and application delivery.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS EC2, S3, IAM, EBS, DLM, Security Groups, VPC, Route 53

CI/CD & Automation: GitHub Actions, Jenkins, Ansible, Terraform, self-hosted runners

Containerization & Orchestration: Docker, Docker Compose, Kubernetes, systemd services

Web & App Servers: Apache, Nginx, SSL/TLS, reverse proxy, Let's Encrypt

Databases: Microsoft SQL Server, MySQL, EF Core migrations, SSMS

Scripting & Dev: Bash, Python, .NET (C#), Django, Git

Monitoring & Security: journalctl, systemd, log analysis, security group hardening

Other: GitHub, Linux (Ubuntu), WSL, SSH, CI/CD pipeline design

PROFESSIONAL EXPERIENCE

DevOps Engineer | **Cydez Technologies** | June 2025–Present

- Sole DevOps engineer for client platforms in education ERP, billing, and oil & gas well monitoring.
- Delivered contract DevOps work for **TechForz** (via Cydez): Billix billing platform and Azure microservices.
- Build and run GitHub Actions CI/CD with self-hosted runners for DEV, QA, UAT, Demo and Prod.
- Manage AWS and Azure infrastructure: EC2/VMs, S3, RDS, IAM, security groups, DNS and SSL.
- Own SQL Server operations: schema migrations, backups, automated data sync and recovery.
- Handle production incidents, security hardening, monitoring and disk/cost cleanups.

DevOps Trainer | **Network Academy, Kadavanthra, Kochi** | May 2025–June 2025

- Trained students on DevOps fundamentals including Linux, Git, Docker, Jenkins, and AWS.
- Delivered hands-on labs on CI/CD pipelines, containerization, and cloud deployments.

DevOps Intern | **Intellipaat** | June 2024–Dec 2024

- Built and managed CI/CD pipelines using Jenkins.
- Gained hands-on experience with Kubernetes, Docker, and Terraform.
- Assisted in automating infrastructure deployment on AWS and Azure.
- Participated in DevOps projects focusing on containerization and cloud-based solutions.

SELECTED PROJECTS

NORA ERP Multi-School Platform | DevOps Engineer | *AWS EC2, GitHub Actions, SQL Server, Apache, Terraform*

- Took 4 schools live on SMS, HRMS, Asset, and Library APIs by resolving schema drift and migration conflicts.
- Automated releases for all schools by building GitHub Actions CI/CD with parallel multi-school deploys.
- Achieved zero data loss migrating the GPS tracking service to AWS via planned DNS cutover and data sync.
- Secured parent payment data by blocking exposed endpoints, closing unused ports, and tightening AWS access.
- Improved reliability and recovery with CloudWatch alarms, AWS DLM snapshots, and nightly S3 backups.

WMR & TWise — Oil & Gas Well Monitoring | DevOps Engineer | *Azure, AWS RDS, GitHub Actions, Docker, Nginx*

- Built GitHub Actions CI/CD for DEV, QA and Demo on Azure with Docker, DB migrations and auto-rollback.
- Automated daily SQL Server sync from client to UAT and AWS RDS, adding only new rows (90K+, no duplicates).
- Recovered 25+ services after a disk-full outage with zero data loss, then moved Docker to a 1.4 TB data disk.
- Fixed recurring site downtime by moving Nginx from Docker to the host, restoring SSL routing for all apps.

- Migrated all pipelines to a new GitHub org by re-registering runners, rotating tokens and moving creds to Secrets.

L&T Proximity Driver Safety Platform | DevOps Engineer | *Azure, Docker, Nginx, .NET 8, SQL Server, GitHub Actions, Bash, Python*

- Eliminated manual deployments by building an automated CI/CD pipeline (Bash, cron, systemd) that deploys within 15 seconds of a merge, runs health checks, and auto-rolls back to the last good commit and database backup on failure.
- Stopped recurring production 500 errors by writing a Python tool that detects and fixes SQL Server schema drift on every deploy, auto-creating missing tables and columns across prod and staging databases.
- Restored a full production outage by tracing it to an Nginx container that lost its SSL and volume mounts, repairing Docker port forwarding, and hardening the compose config so it survives recreation.
- Cut debugging time by diagnosing incidents directly from journalctl and EF Core exception logs (invalid columns, NULL mapping, FK conflicts).
- Wrote a setup runbook covering Nginx, Let's Encrypt, SQL Server in Docker, and a GitHub Actions runner so interns can build the dev environment independently.

Billix — Billing Platform | DevOps Engineer (TechForz) | *AWS EC2, GitHub Actions, Docker, S3*

- Set up CI/CD pipelines for the Billix billing platform using GitHub Actions.
- Configured AWS infrastructure including EC2 instances, S3 buckets, and security groups.
- Automated build and deployment processes, reducing manual deployment time.
- Implemented containerized deployment using Docker for application services.

TechForz Microservices on Azure | DevOps Engineer (TechForz) | *Azure DevOps, Azure, Docker, CI/CD*

- Built and deployed a microservices application on Azure for TechForz (contract via Cydez Technologies).
- Created Azure DevOps CI/CD pipelines that build and deploy each service automatically on every commit.
- Debugged failing builds and deployment errors until every pipeline ran green end to end.
- Managed the Azure DevOps project, including repos, pipelines and environment configuration.

EDUCATION

Bachelor of Computer Applications (BCA) | Devamatha Arts and Science College, Paisakari — Kannur University

CERTIFICATIONS

- DevOps Architect Master's Training Program — Intellipaat (January 2025)
- DevOps Training — Intellipaat (September 2024)
- Azure Administrator Course (AZ-103/AZ-104) — Intellipaat (December 2024)
